DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 7-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jensen, U.S. Patent 5,956,043, 9/1999, 345/430.

As per independent claim 1, Jensen discloses receiving texture image data (col. 6, ll. 10-21), covering a target area in an aperiodic tiling pattern (col. 6, ll. 6, ll. 37-46; col. 7, ll. 4-15). It would have been obvious to one of ordinary skill in the art at the time of invention to use the teachings of Jensen because he allows user or program manipulation for the generation and mapping of supertiles.

As per dependent claim 2 and 9, Jensen discloses scanning images into memory (col. 6, ll. 10-18).

As per dependent claim 3 and 10, Jensen discloses selecting an aperiodic tiling pattern (col. 6, ll. 40-46; col. 7, ll. 33-34), generating a set of tiles (col. 6, ll. 37-51), applying the tiles to the target area (FIG. 14; col. 7-8, ll. 55-10).

Art Unit:2779

As per dependent claim 4 and 11, Jensen discloses covering the target area with tiles using the tiling pattern (FIG. 14), and mapping textured tiles to the aperiodic tiles (col. 7-8, ll. 55-10).

As per dependent claim 5 and 12, Jensen discloses generating a tiling (col. 6, ll. 37-51), the tiling associated with tiles based on the aperiodic tiling pattern (col. 6-7, ll. 59-9), and mapping the textured tiles to the tiling (col. 7, ll 5-9; col. 7-8, ll. 55-10).

As per dependent claim 7 and 13, Jensen discloses using various programs (col. 6, ll. 1-8), but fails to specifically disclose a CAD program. However it would have been obvious to one skilled in the art at the time of invention to use Jensen's disclosure because he discloses using programs to automate tiling generation and mapping.

As per independent claim 8, Jensen discloses instructions (col. 6, ll. 1-8) for performing the method of claim 1. Therefore the rejection as applied to claim 1 is included herein.

As per independent claim 15, Jensen discloses a display (FIG. 10), a target area on the display (col. 7-8, ll. 55-10) and memory (col. 5, ll. 15-30). The rejection as applied to claim 1 is included herein.

3. Claims 6 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jensen as applied to claims 1 and 8 above, and further in view of Deutsch et al., U.S. Patent 5,226,175, 7/1993, 345/419.

Art Unit:2779

As per dependent claim 6 and 14, Deutsch discloses determining a substitution tiling level and using the substitution level to generate the tiling (abstract; col. 6, ll. 20-31), which Jensen fails to disclose. However it would have been obvious to one skilled in the art at the time of invention to combine the disclosures of Deutsch with Jensen because both generate and manipulate supertiles.

Citation of Pertinent Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stephen Schiller, U.S. Patent 5,235,435, 8/1993, 358/456

Stephen Schiller, U.S. Patent 5,285,291, 2/1994, 358/453

Stephen Schiller et al., U.S. Patent 5,305,118, 4/1994, 358/456
